Basic (A2) - Progressing to B1 by mid-2026

EDUCATION

Licentiate in Software Engineering
Universidade Nova de Lisboa
2016

HIGHLIGHTS

▶ 9-year career progression from Junior Developer to Tech Lead at Doinn

▶ Scaled property operations platform supporting €3M annual revenue and 1,000+ daily active users

▶ Integrated 20+ external APIs including multiple PMS systems, payment processors, and subscription platforms

▶ Solo developed Prevalece, a production-ready fintech SaaS platform

PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 10 years of experience building and scaling applications in fast paced startup environments. Expert in the Laravel ecosystem, having led development teams and integrated 20+ third-party APIs including PMS systems, payment processors, and subscription platforms. Proven ability to balance rapid delivery with code quality while mentoring developers and making key technical architecture decisions.

WORK EXPERIENCE

Full-Stack Developer → Tech Lead | Doinn
December 2016 - Present | Lisbon, Portugal & Bern, Switzerland

▶ Progressed from Junior Developer to Tech Lead over 9 years, contributing to all major platform features serving 1,000+ daily active users and supporting 3M€ in annual revenue

▶ Led development of Smart Scheduling module, the platform's core feature automating cleaning and maintenance task assignments across short-term rental properties

▶ Architected and implemented integrations with multiple Property Management Systems (PMS), payment processors, and subscription management systems

▶ Made key technical architecture decisions

▶ Mentored team members as the development team grew from 3 to 6 people, promoting technical excellence and knowledge sharing

▶ Developed and maintained all platform modules including Staff Management, Quality Management, Property Maintenance, and Financial Insights

▶ Balanced rapid feature delivery with code quality, implementing robust testing and quality assurance practices

PROJECTS

Prevalece   prevalece.pt
Solo developed fintech platform for retirement planning and financial management. Implemented investment tracking, performance analysis, and financial decision making tools.
